

MONTTE PROJECTS CASE STUDIES

A black and white photograph of two men in an office setting. One man, wearing a checkered shirt, is looking at a tablet. The other man, wearing a white sweater and glasses, is holding several rolled-up documents. In the foreground, a large white 3D architectural model of a building is displayed on a table. The background shows a desk with a computer monitor and various office supplies.

SOLUTIONS

At **montte**projects we meet the aesthetic and financial needs of each client. We have the finest selection of local and international products to offer the best advice and create unique spaces.

We create designs that not only apply to the product, but also the layout of the space, the identity of the business or its production strategies. We provide solutions for such varied facilities as education centres, multi-purpose facilities such as libraries and civic centres, hospitals and offices.

We provide services for all types of clients, from public institutions, private companies and architecture studios to individuals.
