MONTTE PROJECTS

MONTTE PROJECTS APPROACH

-

We believe in good design. Good design is art. Good design generates curiosity. Good design asks, ‘Why?’ And won’t stop asking until the response is something beautiful. Our design process always has a specific aim in mind, and that is why the result inspires.

-

MONTTE PROJECTS SOLUTIONS

ACCOMPAN- YING ACTI- VELY AND DECISIVELY

Our work consists of actively accompanying designers and architects to help to make their work more customer-oriented.

We seek and find what their customers need and we put it in the hands of professionals. We just offer solutions that enrich and complement their work, making it more sophisticated.

Collaboration makes for excellence.

ONGOING SEARCH, IMMEDIATE RESPONSE

We want those who inhabit a space to feel good, we want the space to convey vitality and generate good sensations in them, and we want to achieve this while respecting the aspirations of our customers and their aesthetic norms. We work hand in hand with professionals in interior design and architecture, without encroaching but by adding and sharing experience, professionalism and a mission. Together we listen, interpret, analyse, seek, advise and execute.

SPACES WITH CHA- RACTER DE- SIGN TO GENERATE EMOTIONS

We like to create spaces that welcome people with open arms. Homes, restaurants, offices, clinics, auditoriums, meeting rooms, airports, etc. They are all spaces that welcome people.

If the design and the architecture manage to improve the relationship between the space and the individual, they will have triumphed. We will help to achieve just that.

Our products and brands are there to sweeten atmospheres. But without overdoing it.

THE POWER OF DETAIL

**Our spaces tell stories.
They leave no one indiffe-
rent.**

You can't tell stories and leave out the details. Just as the sea is impossible without water. A space speaks, communicates, presents itself through its details and its objects. The absence of detail risks creating indifference. And it is precisely the detail that establishes the difference.

MONTTE PROJECTS CONTRACT

CONTRACT

A project by Montte Projects is characterised by its attention to detail and its evocative design. We create value by designing and building memorable spaces that make people think about the spaces they would like to inhabit.

To achieve this, our team works by maximising potential through ongoing improvement, profound technical knowledge geared towards solutions, and offering 360° management in all our projects.
